

RENEWAL CRÈME + RECOVERY CRÈME

Deeply Nourished Skin From Within

ZO[®] SKIN HEALTH

CLINICALLY PROVEN RESULTS

Renewal + Recovery Crèmes

By Week 4

Significant improvement in a more visibly **strengthened + resilient appearance** (as measured by Cutometer®) + **reduction in facial redness** (as measured by clinical grader)

Within 15 Minutes

Significant increase in **skin hydration + moisture replenishment** (as measured by Corneometer®)

By Week 8

Significant improvement in **fine lines + signs of aging**, including **fine lines on the neck** for Recovery Crème (as measured by clinical grader)

PROTOCOL: A 12-week third-party clinical study of 44 subjects to assess the efficacy potential of Recovery Crème. Subjects represent females ages 40–70 with Fitzpatrick skin types I–VI. Supported with use of Gentle Cleanser and Sunscreen + Primer SPF 30 during the study. A 12-week third-party clinical study of 42 subjects to assess the efficacy potential of Renewal Crème. Subjects represent females, ages 42–65, with Fitzpatrick skin types I–IV. Supported with use of Gentle Cleanser and Sunscreen + Primer SPF 30 during the study.

PATIENT EFFICACY
